Abstract

The Purdue OWL provides these tips for writing an abstract in APA format: “On the first line of the abstract page, center the word “Abstract” (no bold, formatting, italics, underlining, or quotation marks). Beginning with the next line, write a concise summary of the key points of your research. (Do not indent.) Your abstract should contain at least your research topic, research questions, participants, methods, results, data analysis, and conclusions. You may also include possible implications of your research and future work you see connected with your findings. Your abstract should be a single paragraph double-spaced. Your abstract should be between 150 and 250 words. You may also want to list keywords from your paper in your abstract. To do this, indent as you would if you were starting a new paragraph, type *Keywords:* (italicized), and then list your keywords. Listing your keywords will help researchers find your work in databases.”

*Keywords:* abstract, APA, research, keywords
Research Paper Title

Start typing your research paper on the next line. Indent every paragraph by pressing Tab once, or by going into Paragraph settings and changing the Special drop-down menu to First Line. If you need help formatting your paper in APA style, contact a librarian. Make an appointment with the Writing Center for help with editing or organizing your paper.
